Securely extend intelligent data capture beyond your organization's walls

Adobe® LiveCycle™ Forms software enables organizations to intelligently capture information to streamline form-driven business processes through automation. Whether users are online or offline, internal or external, Adobe LiveCycle Forms lets organizations deploy secure XML-based forms as Adobe PDF or HTML over any platform or device — from PCs to handhelds — without requiring any new software or plug-ins.
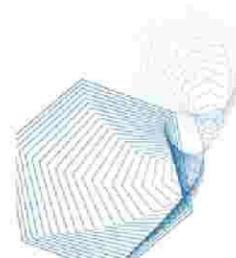

Securely extend core business processes beyond the organization.

Leverage dynamic subforms for data capture to improve user experiences and data accuracy.

Automate forms processing with instant client- and server-side validations and calculations.

Complete and submit forms online or offline.

Enable compliance with government accessibility requirements for online forms.
