DB-HTML Converter PRO1.4

Easy-To-Use ... Web Ready ... Feature Rich

Overview

DB-HTML Converter PRO : is a tool that generates Web pages and HTML reports from *Dbase, Paradox, FoxPro, MS Access, DB2, Informix, InterBase, MS SQL, Oracle, Sybase, ... databases*. Without any additional HTML editor you can create a set of linked web pages that can be put immediately on your web server or viewed with your favorite browser.

Benefits, Features

- **Powerful** : DB-HTML Converter PRO takes full advantage of Windows capabilities and new technologies (BDE - Borland Database Engine; Browsers - as computer platform independent document viewer). Brings together the powerful database maintenance and automatic html document creation functions that make it not only an effective Internet and Intranet publishing tool but also increase your productivity and reduce time spent creating Web pages.
- **Easy-To-Use and Fast** : DB-HTML Converter can be used by beginners as well as advanced users. Web page's and html report's creation process is easy and fast. You can only select a database and fields to be included in the output and press GO push button. DB-HTML Converter, then, begins generating HTML file(s) for the selected database.
- **Flexible** : Advanced computer users will find many additional functions that give them flexibility in the Internet (Intranet) publishing process. A large number of html formatting functions allows you to create an independent site with menus, headers, footers, banners, graphics, hyperlinks, and colors. If you have already templates for your Web documents, DB-HTML Converter PRO will accept them as templates.

Requirements

PC 386 CPU or better; 2 MBRAM; Color monitor; Windows 95, 98, Me, 2000, XP, NT; Requires only 400 Kbytes of disk space.

Comments ...Primasoft HTML Pro Converter came to the rescue.
This software is capable of quickly and simply converting thousands of lines of MSExcel spreadsheet into thousands of HTML files ready for immediate FTP transfer to the server. A few hours creating templates, a few minutes creating HTML files and job was reduced from weeks to hours. With HTML Pro Converter site management such as price changes is even quicker and easier than with dynamic (data base driven) HTML sites..."
